CONSENT FOR PURPOSES OF TREATMENT/ PAYMENT & HEALTHCARE OPERATIONS

I acknowledge that Antoniotti Chiropractic Offices "Notice of Privacy Practices" has been provided to me.

I understand I have a right to review Antoniotti Chiropractic Offices Notice of Privacy Practices prior to signing this document. Antoniotti Chiropractic Offices Notice of Privacy Practices has been provided to me. The Notice of Privacy Practices describes the types of uses and disclosures of my protected health information that will occur in my treatment, payment of my bills, or in the performance of health care operations of Antoniotti Chiropractic Offices. The Notice of Privacy Practices for Antoniotti Chiropractic Offices is also provided on request at the main administration desk of this practice. This Notice of Privacy Practices also describes my rights and Antoniotti Chiropractic Offices duties with respect to my protected health information.

Antoniotti Chiropractic Offices reserves the right to change the privacy practices that are described in the Notice of Privacy Practices. I may obtain a revised notice of privacy practices by calling the office and requesting a revised copy be sent in the mail or asking for one at the time of my next appointment.

ABOUT FINANCIAL ARRANGEMENTS + HEALTH INSURANCE

We are committed to providing you with the best possible care. If you have health insurance, we are eager to help you receive your maximum allowable benefits. In order to achieve these goals, we need your assistance, and your understanding of our payment policy.

Payment for services is due at the time services are rendered until all insurance coverage has been verified; we accept cash, check, MasterCard, Visa, and Discover. We will be happy to help process your insurance claims for your reimbursement. A completed insurance form must accompany any such requests.

Once insurance coverage has been verified we will gladly accept your insurance assignment for that portion of your bill estimated to be covered. Any services provided by our office, not covered by your insurance company, are due following notification of denial from your insurance carrier.

- 1. Your insurance is a contract between you, your employer, and the insurance company. We are not a party to that contract.
- 2. Our fees are generally considered to fall within the acceptable range by most companies. This applies only to companies who pay a percentage (such as 50% or 80%) of "U.C.R.". Most insurance companies define "U.C.R." as Usual, Customary, and Reasonable.
- 3. Not all services are covered benefits in all contracts. Some insurance companies arbitrarily select certain services they will not cover.

We will gladly discuss your proposed treatment and answer any questions relating to your insurance. You must realize, however, that:

We must emphasize that as health care providers, our relationship is with you, not your insurance company. While the filing of insurance claims is a courtesy that we extend to our patients, all changes are your responsibility from the date the services are rendered. We realize that temporary financial problems may affect timely payment of your account. If such problems do arise, we encourage you to contact us promptly for assistance in the management of your account. If you have any questions about the above information or any uncertainty regarding insurance coverage, PLEASE do not hesitate to ask us. We are here to help you.

I understand that if I suspend or terminate my care and treatment, any fees for professional services rendered me will be immediately due and payable.

I hereby authorize the doctor to treat my condition, as he deems appropriate. I understand and agree that x-ray
negatives will remain the property of this office, being on file where they may be seen at any time while a patient o
this office. The doctor will not be held responsible for any pre-existing medically diagnosed conditions, nor for any
medical diagnosis.

INFORMED CONSENT

We encourage and support a **shared decision making process** between us regarding your health needs. As a part of that process you have a right to be informed about the condition of your health and the recommended care and treatment to be provided to you so that you can make the decision whether or not to undergo such care with full knowledge of the known risks. This information is intended to make you better informed so that you can knowledgeably give or withhold your consent.

Chiropractic is based on the science, which concerns itself with the relationship between structures (primarily the spine) and function (primarily of the nervous system) and how this relationship can affect the restoration and preservation of health.

Adjustments are made by chiropractors in order to correct or reduce spinal and extremity joint subluxations.

Vertebral subluxation is a disturbance to the nervous system and is a condition where one or more vertebra in the spine is misaligned and/or does not move properly causing interference and/or irritation to the nervous system. The primary goal in chiropractic care is the removal and/or reduction of nerve interference caused by vertebral subluxation.

A chiropractic examination will be performed which may include spinal and physical examination, orthopedic and neurological testing, palpation, specialized instrumentation, radiological examination (x-rays), and laboratory testing.

The chiropractic adjustment is the application of a precise movement and/or force into the spine in order to reduce or correct vertebral sublixation(s). There are a number of different methods or techniques by which the chiropractic adjustment is delivered, but are typically delivered by hand. Some may require the use of an instrument or other specialized equipment. In addition, physiotherapy or rehabilitative procedures may be included in the management protocol. Among other things, chiropractic care may reduce pain, increase mobility, and improve quality of life.

In addition to the benefits of chiropractic care and treatment, one should also be aware of the existence of some risks and limitations of this care. The risks are seldom high enough to contraindicate care and all health care procedures have some risk associated with them.

Risks associated with some chiropractic treatment may include soreness, musculoskeletal sprain/strain, and fracture. Risks associated with physiotherapy may include the preceding as well as allergic reaction and muscle and/or joint pain. In addition, there are reported cases of stroke associated with visits to medical doctors and chiropractors. Research and scientific evidence does not establish a cause and effect relationship between chiropractic treatment and the occurrence of stroke; rather, recent studies indicate that patients may be consulting medical doctors and chiropractors when they are in the early stages of a stroke. In essence, there is a stroke already in process. However, you are being informed of this reported association because a stroke may cause serious neurological impairment.

have been informed of the nature and purpose of chiropractic care, the possible consequences of care, and the risks of care,
including the risk that the care may not accomplish the desired objective. Reasonable alternative treatments have been explained,
$including \ the \ risks, consequences, and \ probable \ effectiveness \ of \ each. \ I \ have \ been \ advised \ of \ the \ possible \ consequences \ if \ no \ care$
is received. I acknowledge that no guarantees have been made concerning the results of the care and treatment.
